

EXPORT PROJECT FROM SCRIPTCASE

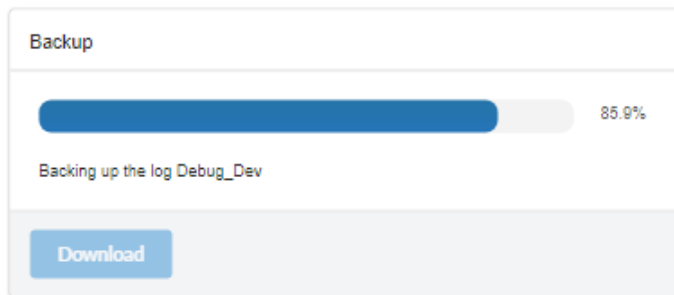

Use to take very long and now does not go through anymore

I CAN'T BACKUP MY PROJECT ANYMORE

When I export a project from menu "Project/Export project", it takes a huge amount of time and finally it does not go through. It gets stuck after 80%

It looks like it is because of the log module. This module is named "Debug_Dev" and I have attached further below how it is set up.

This is what I get when exporting. It goes up 1% per 1% and gets stuck after 80%

This below is how my log module is set up. I have removed all apps from the log module, but this does not change anything.

SCHEME	DESCRIPTION	DEAFULT SCHEMA	ACTION
Debug_Dev			

Edit Applications New scheme Create Application Log

Edit scheme ?

Name* Name for your schema.

Description Schema description

Connection* Connection to be used to store the log table.

Table* Table to store the log. In case it does not exist, it will be created by Scriptcase automatically.

Delete table if it exists This option will delete (drop) the table if it already exists.

Deafault Schema Set this scheme as default for the project.

Login Variable that stores the login. eg.: [variable]

Default Values

Events Log events that will be saved within tables.

Recording Mode* Only key All Fields Data thar will be saved within the Log table.
